

In line with the government of the Principality of Monaco, which for many years has been pursuing a proactive sustainable development policy, Grimaldi Forum Monaco has developed and deployed a management system that aims to improve the social, economic and environmental impact of all its activities.

SERVING A SUSTAINABLE SOCIETY

Since its inception in 2000, Grimaldi Forum Monaco has been a committed stakeholder both at home and in the events industry at large, resolutely taking action to promote a sustainable society for future generations. As a conference venue and cultural center, its 35,000 m2 of modular exhibition space delivers the perfect solution for conferences, congresses, trade fairs, exhibitions, concerts and shows. Hosting an average of 100 events and 250,000 people a year, the site is well respected for its high quality, custom event services and supremely professional staff.

ISO 14001 certified since 2008, its building is eco-designed and eco-managed, and with 2,500 m2 of photovoltaic panels on its roof, it is the leading producer of solar energy in the Principality. ISO 20121 certification also crowns the Grimaldi Forum Monaco's commitment to social responsibility. As part of a continuous improvement strategy, the GFM is pursuing its efforts on a number of environmental, social and social solidarity projects, steered by an ISO committee made up of 18 members representing all the company's departments.
